PROFESSIONAL SUMMARY

MERN Full Stack Developer with 6 months of hands-on training, having designed and delivered 3 production-ready web applications. Proficient in React.js, Node.js, Express.js, and MongoDB, with demonstrated ability to reduce API response times by 25% through query optimization and database indexing. Experienced in JWT-based authentication, responsive UI development, and cloud deployment on Vercel and Render.

TECHNICAL SKILLS

Languages & Frameworks: JavaScript (ES6+), TypeScript, React.js, Node.js, Express.js, Next.js, HTML5, CSS3, Tailwind CSS, Bootstrap

Database & Backend: MongoDB, Mongoose, REST APIs, JWT Authentication, CRUD Operations, bcrypt, API Optimization, Redux Toolkit, Socket.io

Tools & Deployment: Git, GitHub, Postman, Thunder Client, Vercel, Render, Docker, Firebase, Figma, VS Code

TRAINING

MERN Stack Developer Trainee | SLA Institute

Nov 2025 – May 2026 | Chennai

- Architected and delivered 3 full-stack web applications using the MERN stack (MongoDB, Express.js, React.js, Node.js), following RESTful API design principles and MVC architecture.
- Reduced API response time by 25% across projects by implementing MongoDB query optimization, compound indexing, and efficient aggregation pipelines.
- Practiced Git-based version control and collaborative development workflows (branching, pull requests, code reviews) in a team environment, improving code quality and reducing bugs.

PROJECTS

SkillMatch – Full Stack Job Platform — React.js | Node.js | Express.js | MongoDB | JWT | Tailwind CSS

- Built a full-stack job marketplace serving 100+ users by designing role-based access control (employer/candidate) using JWT authentication and bcrypt password hashing, eliminating unauthorized access.
- Reduced API response time by 25% through optimized MongoDB query design and indexed collections on high-frequency fields (skills, location, salary), improving search UX significantly.
- Developed separate dashboards for job posting, application tracking, and profile management; deployed on Vercel (frontend) and Render (backend), achieving zero-downtime production release.

E-Commerce Web Application — React.js | Node.js | Express.js | MongoDB | Tailwind CSS | Multer

- Developed a complete e-commerce platform with product browsing, cart management, and checkout; built dynamic listings with category filtering, search, and sort, achieving 100% mobile responsiveness using Tailwind CSS.
- Designed an admin panel with image upload via Multer and enforced data integrity through Mongoose schemas for products, users, and orders, reducing data inconsistency errors.
- Implemented persistent cart with real-time price calculation using React state management, enabling seamless multi-product checkout across sessions.

SmartScript – RTOS Documentation Web App — React.js | Node.js | Express.js | MongoDB | Mongoose

- Developed a full-stack web application for SmartPilot RTOS using React.js and Node.js with responsive frontend interfaces built from reusable React components.
- Created REST APIs using Express.js for handling project data and user interactions with MongoDB and Mongoose for database management.

CERTIFICATIONS

- MERN Full Stack Developer Certificate — SLA Institute (2026)
- Frontend Development Certificate — IBM (2025)
- MongoDB Developer Certificate — MongoDB University (2025)

EDUCATION

B.E. in Computer Science Engineering | MRK Institute of Technology
